- Founded in 1997
- Delivered First Subsea Field Development Project in Lagos, Nigeria
 - Aje Subsea Field Development Project
- Pioneered the laser scanning technology in Nigeria

Assets

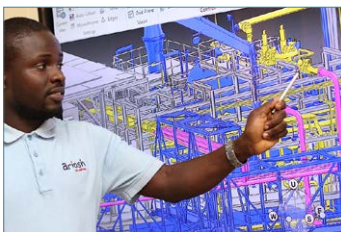

- Over 300 experienced professionals
- World class facilities

Operating Area

- West Africa

What we do: Concept to Commissioning

Engineering

Ariosh is a respected design, engineering and construction management company in Nigeria, West Africa.

We have been delivering engineering projects to the oil and gas industry for over 10 years.

Procurement

Ariosh's supply chain programs enable us to effectively coordinate strategic sourcing, materials management, warehousing and logistics optimization.

We consistently deliver quality materials on schedule.

Construction

Our construction projects include the delivery of onshore modules, offshore platforms and subsea floating systems.

Ariosh has built a reputation for safety, quality and schedule performance in the management and execution of construction projects.

Installation

Ariosh installation capabilities include the installation of SURF - Subsea Umblicals, Risers and Flowlines

Our experienced project teams provide fully managed, safe, and efficient services for the installation of subsea infrastructure.

Our Activities: Onshore, Offshore & Subsea

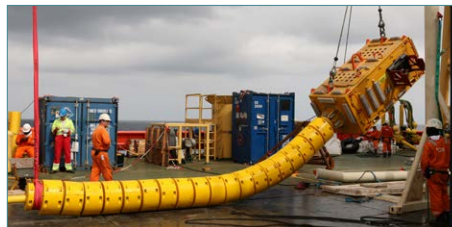

Conventional EPCI

At Ariosh, we engineer, construct and install onshore and offshore modules, fixed platforms and associated pipelines.

Our focus is on FEED, detailed engineering, brownfield modification, fabrication, construction, hook-up, installation and revamp of fixed platforms and associated pipelines.

SURF EPCI

Ariosh is the most reputable indigenous subsea service company in Nigeria.

We provide an extensive range of subsea services and have robust Engineering, Procurement, Construction & Installation (EPCI) capabilities in the Subsea Umbilicals, Risers & Flowlines (SURF) segment.

We successfully delivered the first subsea field development project in Lagos, Nigeria - Aje Field Development project phase 1.

OIMR

Ariosh conducts Operation, Inspection, Maintenance and Repair services (OIMR) on subsea facilities, offshore platforms, rigs and subsea pipelines in West Africa.

Complementary Services

Our complementary services are focused on Seabed Mapping, Survey & Positioning, Tie-in & Diverless Intervention, Field Abandonment & Decommissioning.

Our Core Values

Integrity

We pride ourselves in upholding the highest ethical standards in our relationships with clients, partners, host communities and other stakeholders.

Performance

Our people are performance-driven and they strive to continually enhance productivity while maintaining an unwavering focus on quality and safety.

Innovation

We believe in the application of innovative technologies to keep abreast of global industrial best practices

Teamwork

Our culture of creative thinking and collaborative problem solving enables us to consistently achieve success in challenging situations.
