

Field Wide Piping Replacement

Mobil Producing Nigeria (MPN)

Ariosh was awarded the detailed engineering contracts for brownfield modification of Ubit complex to install pigging facilities on Ubit platforms.

The Ubit field consists of 24 wellhead platforms flowing to a production platform and a Gas Compression Platform via network of Pipelines. There had been no internal inspection of some of these pipelines as they were not equipped with pigging facilities.

The scope of work included Detailed engineering design (DED) covering:

- Installation of Pigging Facilities
- Piping Tie-in to existing facilities
- E&I Hookup
- Flushing and pigging studies
- Material Handling Study
- Transient Flow Studies
- Construction Scope of Work
- Construction Workpack

Services

Detailed Engineering Design (DED) & Construction Support

Location

Lagos , Nigeria

Total Manhours

Over 6,000

Safety Record

Zero LTI, Zero MTI

Status

Completed Q4 2013
