

## Ibot Wellhead Platform Project

MOBIL PRODUCING NIGERIA UNLIMITED (MPNU)

The Ibot Wellhead Platform Project has an objective of Detailed 3-D laser scan data acquisition of systems, structures, piping and ancillary equipment on Ubit GW in its entirety. It was expected that the as-built conditions of the facility shall be captured with 3-D Laser scanning technology.

The scope of work performed by Ariosh on the project includes but not limited to the following:

- Field survey of the Ubit GW in its entirety (3-D laser scanning).
- Platform walk-through to capture the non-dimensional details on the facility
- Post-processing of the raw data
- QA/QC and delivery of Laser scan data in LFD and TruView formats

### Services

Detailed Engineering Design,  
As-Built Documentation

### Location

Nigeria West Africa

### Facilities

Ubit GW.

### Safety Record

Zero LTI, Zero MTI

### Status

Completed Q4 2017
