

Ariosh delivers onshore and offshore engineering projects for oil & gas related facilities. We provide services to support facilities engineering for small, medium and large capital projects (brownfield & greenfield). We are industry leader in this service segment having successfully delivered several projects which entail core capabilities of engineering design and effective project management.

Our engineering services cover Feasibility Studies, Conceptual Design, Basic Engineering (BE), Front-end Engineering and Design (FEED), Detailed Engineering Design (DED), Follow-on Engineering (FOE) and Procurement Support of long lead equipment and material items.

Our Engineers have extensive knowledge and experience in the design, construction, modification and installation of typical facilities in the following segments:

- Offshore:
 - Deepwater: FPSO, subsea production system, pipelines etc.
 - Shallow Water: Process and drilling platforms, subsea pipelines, FSO, FPU, etc.
- Onshore: Oil terminals, flowlines, pipelines, oil clusters, gas plants, flow stations, etc.
- Infrastructure projects: Building, roads, airport facilities, community development works etc.
- Provision of sufficient infrastructure, personnel, proven work processes and tools to support all projects management activities related to the delivery of engineering services.

Execution Capabilities

Conceptual Studies

Ariosh delivers solutions to define and optimize projects prior to substantial investment in order to meet the strategic objectives of our client, quantifying the benefits and highlighting the risks.

Front End Engineering Design

With extensive experience in engineering, procurement and construction (EPC), Ariosh knows the optimum level of detail required for a FEED to allow successful project delivery.

Detail Engineering Design

Ariosh's strategic approach enables us to facilitate fast-track execution, while controlling change, and managing out-of-phase activities, while maintaining consistency throughout the project's life-cycle.

Construction Support

We listen closely to your needs to provide project leadership throughout the construction process, adding value every step of the way.

Precommissioning/Commissioning

Ariosh provides Precommissioning and commissioning support for systems to ensure they perform as anticipated and correct any remaining problems prior to Plant Operational Start-up.
