## Introduction

The project involved revamping the IYAK SB wellhead platform consisting of wellheads and the associated process equipment. The platform has an upper and lower boat landing decks, a cellar deck, subcellar deck and a helideck.

## Project Scope:

Refurbishment of the IYAK SB's :

- Helideck: Blasting, painting, marking and lettering of the Helideck. Fabrication and installation of a new dock house and new gratings.
- Sub cellar Deck: Fabrication of new security fence gate with locking system. Wash and clean-up the congealed oil and water mixture in the sump tank and pumps skids. Clean-up and paint handrails around the security fence gate.
- Boat Landing Deck: Demolition and replacement of corroded and damaged handrail, corroded gratings and structural supports. Cut and weld new cover plates for the boat landing bumper assembly.
