Introduction

Ariosh was contracted to carry out the Structural Revamp and Access Restoration Project on the USARI FA platform which was initiated as part of the Access Restoration and Minor Topsides Repair Campaign managed by the MPN Field Maintenance Services Group.

Project Scope:

- The structural revamp, maintenance and refurbishing of the helideck, upper and lower boat landing, boat landing deck and cellar deck on Usari FA.
- Fabrication and Installation of dock house, handrails, stair case rungs and gratings;
- Installation of wind sock, gratings walls, security key;
- Complete grit blasting and application of three layer coating system;
- Repair of damaged safety net and replacement of the missing safety net on the helideck;
